1 June 1972

MEMORANDUM FOR: Deputy Director for Intelligence

SUBJECT: Draft CIA Regulation Implementing
E.O. 11652

STAT 1. [] newly designated Agency Records Management Officer per Mr. Colby's 26 May memorandum on Information Control, advises that the Executive Director is considering revisions to the draft CIA regulation on E.O. 11652 as indicated on the attached pages. He will probably raise these points at the meeting he has scheduled for Friday afternoon.

morning

a. Page 10 - He may wish to combine subparagraphs (c) and (d).

b. Page 25 - According to [] he is thinking of assigning responsibility for Top Secret control to the Office of Security. It is now in CRS. CRS has no objection.

STAT

c. Page 27 - Mr. Colby intends to add a paragraph referring to secrecy agreements and contractual obligations thereunder.

d. Page 28, paragraph B. - He wants to strike the first seven lines and change the sentence to read, "The Executive Director (instead of the Central Reference Service) shall establish a data index system to index documents..."

STAT [] says his intention is for each Directorate to be responsible for its own data index system, presumably to overcome DDP objections to a centralized index which would have to include all DDP items of permanent value.

SUBJECT: Draft CIA Regulation Implementing E.O. 11652

This will lighten the anticipated load on CRS but it will also lessen cost effectiveness. What CRS would do once for everybody will now be duplicated in the other Directorates for those items which CRS already enters into the AEGIS system. CRS, of course, has been responsible only for narrative positive intelligence. We don't know to what extent other forms of classified information of permanent value will be involved. Decentralization of the indexing responsibility will preserve and possibly strengthen existing limitations on analyst access to DDP reporting.

e. Page 29 - Reference to the Director, Central Reference Service will be replaced by the Records Management Board.

f. Page 32 - The General Counsel may be the CIA member of the Inter-Agency Committee but this will not be required by the draft regulation. [] says Mr. Colby plans to strike paragraph 2.

STAT

g. Page 33 - Reference to the Director, Central Reference Service will be deleted.

2. Page 18 - CRS analysts have pointed out that none of the four exemption categories (pages 13 and 14) accurately describe the case if they wish to exempt an IM or IR based on exempted source documents originated before 1 June 1972 which are less than 10 years old. I suppose we would cite Category 2. Though of no great moment, this question will probably be of interest to all production offices.
